California Energy Commission Refrigerant Service Technician Study

Earn a \$100 gift card for sharing your expertise!

Calling all Building HVAC Refrigerant Service Technicians: The California Energy Commission wants to hear from you. Their independent contractor, Arup, is conducting a series of interviews to understand your thoughts on training, certification / licensure, and refrigerant handling and reclamation practices. Your experiences and first-hand knowledge are invaluable in shaping future state policy. Participants working for companies with 1-10 technicians are particularly desired.

Interviews are confidential and conducted by telephone/teleconferencing with recording for cross-referencing purposes. After hours interview time slots are available.

With only 90 interview slots left during January, there's a limited time to take advantage of this opportunity to make your voice heard and earn a \$100 gift card!

To participate, simply email refrigerantreclaim@arup.com and you will be contacted quickly for next steps.

Please note this has no effect on your certifications or licenses and is voluntary.
